

## **Thumb Print Bees**

My favorite crafts are the one that have me giggle as I do them. Thumb print bees was easy and giggle-worthy. With minimal mess, this is a great project to do with younger kids.

### Materials:

Black construction paper  
Yellow paint  
White crayon  
Popsicle stick

### Directions:

1. Dip a thumb into the yellow paint and press onto the construction paper. Repeat until you have reached the desired number of bees. (Also, you can experiment with all fingers to make bees of different sizes!)
2. Before the paint dries, draw two lines through the bee using a popsicle stick.
3. Draw on wings and antennae for each bee.

**Ages: 3-8.**
